

PRODUCT MANUAL

INTEROJO **High Definition Vision Lens** technology effectively controls spherical aberration for crisper, sharper and clear vision

INTEROJO

The Leading Vision Care Innovator

Company History

INTEROJO

- **2024. Aug** Acquired CE MDR
- **2023. Dec** 70 Million dollars Export Award
- **2020. Nov** Established the Third Factory
- **2016. Jun** Selected as a Member of World Class 300 Enterprise by Korean Government
- **2016. Mar** Established China Branch Office
- **2014. Jul** Selected as Asia's 200 Best Under a Billion US \$ by Forbes Asia
- **2012. Dec** 20 million dollars Export Award
- **2012. Mar** Established the Second Factory
- **2010. Nov** 10 million dollars Export Award
- **2010. Jul** Listed on KOSDAQ (Korean Securities Dealers Automated Quotations)
- **2009. Dec** PCT (Patent Cooperation Treaty) and EPC (European Patent Convention)
Patent pending technology - Hydrogel contact lenses having improved wettability
- **2008. Dec** United States 510(K) cleared - 55% Methafilcon A
- Single vision, Toric, Multifocal soft contact lens
- **2007. Apr** Acquired Patent of Contact Lens for cure
- **2006. Oct** Moved to a New Factory
- **2005. May** Approved for conformity of the quality control for medical device (GMP)
(by Korea Food & Drug Administration)
- **2004. Aug** Selected as the model of a small & medium business enterprise with technical innovation
(Inno-Biz) (by Small and Medium Business Administration)
- **2003. Apr** Acquired KGMP (Korean Pharmaceutical Manufacturers Association)
Certification (by Korea Food & Drug Administration)
- **2001. Dec** United States 510(K) cleared
- Polymacon Material
- Single vision, Color, Toric, Multifocal, Toric Multifocal Soft Contact Lens
- **2001. Oct** Acquired CE0120, ISO-9001, EN46002 Certification
- **2000. Dec** Registered manufactory facilities

Silicone Hydrogel

Clalen O202 1-Day

INTEROJO's own material-based silicone hydrogel lens provides comforts and makes eyes healthy with high DK and high water content through INTEROJO's innovative GrabSoo technology.

Type	Spherical	Toric	Multifocal
Base Curve		8.6 mm	
Diameter	14.2mm	14.5 mm	14.2mm
UV protection		UV Class I	
UV A Transmission Rate (%)		< 9.5%	
UV B Transmission Rate (%)		< 0.95%	
DK		70	
DK/t(@-3.00D)	106	77	103
Water Content		45%	
Material	Inofilcon A		
Power	-12.00 ~ -6.50 (0.50 step) -6.00 ~ +6.00 (0.25 step) +6.50 ~ +8.00 (0.50 step)	S.P : +6.00 ~ -6.00 (0.25 step) -6.50 ~ -12.00 (0.50 step) CP : -0.75, -1.25, -1.75, -2.25, -2.75 Axis : 0° ~ 180° (Every 10° step)	-12.00 ~ -6.50 (0.50 step) -6.00 ~ +6.00 (0.25 step) Add: +1.00 ~ +2.50 (0.50 step) (Multifocal Design : CN)
Feature	Grabsoo Technology HD Vision Aspheric Design		

Feature

GrabSoo™ Technology

Hydrophilic Polymers grab each other tight like LEGO blocks. This combination lowers the contact angle and increases surface lubricity, which leads to the utmost comfort. Also, these combined polymers keep the water and prevent the cornea from protein disposition.

Silicone Hydrogel

Clalen O202 Color 1-Day

Clalen O202 1-Day is made of silicone hydrogel material that provides vision correction with high DK rate. With soft and natural colors and clear circle line, your eyes look more sophisticated and attractive.

Hydrogel

Clalen 1Day / Morning Q 1Day

INTEORJO's Hydrogel 1Day Clear lenses are extra comfortable with ASSL technology along with three different materials. Bioxifilcon with Hyaluronic Acid¹⁾, Hioxifilcon with GMA, Methafilcon that proved its stability across the globe

1)Hyaluronic acid: It naturally lies in the vitreous body of eyes, joints, placenta, and skin and has a moisture-binding ability.

Base Curve	8.6 mm		
Diameter	14.2 mm		
Power	+6.00 ~ -6.00 (0.25 step) -6.50 ~ -12.00 (0.50 step)		
UV Protection	UV Class II		
UV A transmission rate %	< 30%		< 85%
UV B transmission rate %	< 5%		< 40%
Water Contents	58 %	58 %	55 %
Material	Bioxifilcon A	Hioxifilcon A	Methafilcon A
Feature	UltraSoo Technology HD Vision Aspheric Design ASSL Technology	HD Vision Aspheric Design ASSL Technology	HD Vision Aspheric Design ASSL Technology

Feature

ASSL Aqua Safety Shield Layer

ASSL - applied contact lens is more hydrophilic, has more reduced contact lens angle, and has more smoother surface with less protein deposition than the uncoated contact lens

Hydrogel

Morning Q Ultra Soo 55 / Morning Q 55UV / Clalen 55S

INTEROJO's Hydrogel FRP Clear lenses provide excellent fit by three different kinds of materials. Bioxifilcon with Hyaluronic Acid, Hioxifilcon with GMA, Methafilcon that proved its stability across the globe.

1)Hyaluronic acid: It naturally lies in the vitreous body of eyes, joints, placenta, and skin and has a moisture-binding ability.

Feature	HD Vision Aspheric Design		

Feature

Ultra-Soo lens Sodium Hyaluronate Lens

Ultra Soo is an Interjo’s patented technology that employs Sodium Hyaluronate, which is the most moisture-absorbent molecules. By adding Sodium Hyaluronate with other raw materials including HEMA, the contact lens with Ultra Soo Technology provides excellent comfort with optimum wetting and all-day hydration.

Hydrogel

Clalen Astra Glitter / Estelle

Clalen Astra Glitter is a design inspired by subtle images of flowers, decorated by gold red pearl. Clalen Astra Estelle allows you to experience the sparkling and natural eyes by the combination of a subtle expression of pearl and gradation edge.

Feature

D.S.S.L Technology [Dual Safety Shield Layers]: Interjo's color 1-day Printing Technology

Pigment printing diagram

Cross sectional image of Color 1-Day Lens

How pigment does not touch the eye

1. Ultra Clear HEMA coats printed part and builds an extra layer
2. Coated pigments initially form a shield

* Ultra Clear HEMA : HEMA produced by PBH (Pre-Bonding-HEMA method)

Hydrogel

Clalen Iris 1Day

Clalen Iris 1Day is a design that divides pupil and iris and enhances your look with naturally radiant eyes. It is safe because the color pigments do not directly touch the eyes, and you can enjoy different looks with colors you want every day.

Material	Polymacon	Hioxifilcon D / Methafilcon A
Feature	HD Vision Aspheric Design	

Feature

High Definition Vision Lens

The Interojo's High Definition Vision Lens, unlike other aspheric lens in the market, incorporates the ideal aspheric curvature for each soft lens power and thickness and compensate for aberration caused by lens flexure on the eye. This results in improved visual acuity at all distance, as well as increased depth of field, reduced refractive astigmatism and improved contrast sensitivity, providing crisper, sharper and clearer vision.

• Vision with Conventional Soft Lens

Blue-light Blocking

Clalen Freedom 380

Clalen Freedom 380 selectively blocks the blue light through the yellow color in the center of the lens. Entire visible light is transmitted through the rest of the uncolored part to ensure a clear vision and aesthetic appearance when it is worn.

Blue-light Blocking

Feature

- Inserting only blue light blocking functionality into the optics is the key technology
- Applied Optimal Optics Printing Outer Diameter of 8mm
 - Covers the maximum size of the pupil (in the dark)
 - Maintains aesthetics with color areas smaller than the size of the iris
- Blue light blocking rate $16\% \pm 5\%$ from 400 to 450nm

Blue light is a range of the visible light spectrum, defined having a short wavelength between 400 to 450nm with high energy. Blue light penetrates the lens and adversely affect retinal Epithelial cells (Macular degeneration, Eye strain, Decreased vision, etc). When protected by Freedom 380, it blocks the high energy blue light and significantly reduces aging of the retina.
